## Directions for using the catalogue

The present catalogue comprises all parts of the MT.... electric hoists.

The tables show the numbers of the figures and the positions, the name, quantity and catalogue number of the parts for the specific modification. If for a group or subgroup a single illustration is used, it may be given after the table but not in the table column.

The units whose positions are in the circle, can not be disassembled and are delivered as whole sets. Standards articles such as bolts, nuts, safety rings, etc., which usually are not offered as spare parts, but it's not impossible for the customer to order them. They are shown and described for the sake of facilitating the electric hoist maintenance. When replacing them make sure to observe the strength class of the tightening elements.

The lifting speeds and the lifting height are denoted in the passport.

Type of the motors are denoted in the passport
